Purple Cat Mobile Veterinary Clinic uses qualified staff and approved materials for all procedures performed. It is important for you to understand that the risk of injury or death, although low, is always present, just as it is for humans undergoing surgery. Please read the following and ensure you understand before signing your name:

- I, acting as owner or agent of the pet named above, hereby request and authorize Purple Cat Mobile Veterinary Clinic to surgically sterilize the animal named on the above portion of this form.
- I understand that the surgery I have elected presents some hazards, and that injury to, or death of, my animal may conceivably result, due to inherent surgical risks and the use of anesthetic drugs as required for this procedure.
- I understand my cat may be exposed to contagious diseases such as upper respiratory infection and fleas and these are preventable and Purple Cat recommends all cats be vaccinated at least 2 weeks prior to surgery and be current on flea preventative for best health.
- I certify my cat has either been vaccinated for Feline Herpes/Calici/Panleukopenia (3-way) within one year prior to this date or if not vaccinated I understand the risks of illness and waive all claims arising out of, or connected with, the performance of this operation due to such failure.
- I certify that my animal is in good health and IS LESS THAN 7 YEARS OF AGE (TNR and farm cats excluded).
- I understand that Purple Vet staff may not perform a complete physical exam prior to surgery and that my animal will not receive preanesthetic bloodwork and waive my right to have these services performed prior to surgery at a full-service veterinarian.
- I understand that some factors significantly increase surgical risk, including, but not limited to, pregnancy, heat, respiratory infection, and diseases such as FIV, FeLV and FIP.
- I understand that if my animal is pregnant, the pregnancy will be terminated at the time of surgery.
- I understand it is advised not to spay female cats in third trimester pregnancy due to high complication risk which may result in death.
- I understand that if my pet is anesthetized for surgery but found to already be spayed and/or neutered or found to be cryptorchid (male whose testicles have not come down into scrotum) and surgery is cancelled (we do not always perform cryptorchid surgery) there will be a \$35 sedated exam fee.
- I hereby release Purple Cat Mobile Veterinary Clinic, all veterinarians, assistants, volunteers & employees from any and all claims arising out of, or connected with, the performance of this procedure or any adverse reactions from vaccinations. I agree that I have not and will not claim any right of compensation from them, or any of them, or file action by reason of such sterilization or attempted sterilization of such animal or any consequences related thereto. Owner/agent herby agrees to indemnify and hold Purple Cat Mobile Veterinary Clinic harmless for any damages caused during the transportation of the animal, or for any damages caused by any unforeseen events including fire, vandalism, burglary, extreme weather, natural disasters, and acts of God.

	events including fire, vandalism, burglary, extreme weather, natural disasters, and acts of God.			
•	I understand my animal will re	understand my animal will receive a small green tattoo on his/her underside to show that he/she has been sterilized.
